## art basel miami beach containers

these days my biggest concern is to find a decent prefabric construction unit both for office and sales office spaces, therefore at the art basel miami beach the trailers converted to art galleries were more than interesting for me, but especially one, [mytgallery](#) was excellent, there I found where I could spend at least two months salary...the name of the artist is Ariel Orozco, and the piece that I fell in love is "double consumption" which consists of 120 black and white photographs showing an eraser as a model and at the same time erasing the model creating the next process, brilliant, perfect graphical effect, I just loved it. Please check the website for this young gallery full of shiny artists and pieces.
